MOULDING SPECIES

MOULDING WOOD SPECIES

OAK

Oak grows primarily in the North Central United States. It is a heavy, strong, light colored, dense wood, with

coarse texture, deep straight grains and accepts a broad range of stains and finishes.

POPLAR

Poplar grows in the Eastern United States. Colors vary from brown to pale to olive green. It is a medium density

hardwood, generally straight-grained with a fine, even texture.

KNOTTY ALDER

Knotty Alder grows primarily in the Pacific Northwest. It is a medium density hardwood with an even grain appearance. The wood is normally light brown with hues of red or peach. Its soft nature makes receptive to a variety of stains & finishes.

MAPLE

Maple grows in the Eastern United States. It has a mild grain and is white in color with hints of reddish brown.

Mid-Am will only finish with a clear coat or light stains.

LAUAN

Lauan grows in Southeast Asia. The common name for this wood is Meranti or Philippine Mahogany, though

bears no relation to "true" Mahogany.

PINE

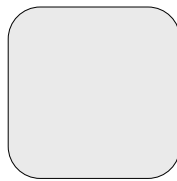

Pine is abundant in America. The wood tends to be a honey-toned or straw color while knots are reddish brown. Clear or light stain finish is recommended.

FINGER-JOINT PINE

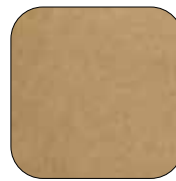

Finger-Joint (FJ) Pine are smaller pieces of wood joined together to create longer lengths to allow

less installation joints typical of solid woods.

PRIMED FINGER JOINT PINE

Primed Finger-Joint Pine allows for a better paint finish and color match process for any project.

MDF - MEDIUM DENSITY FIBERBOARD

Soft and easy to install, MDF offers similar benefits to Finger Joint Pine. It is manufactured in standard builder lengths; free of knots, splits, checks or raised grains; and copes and miters easily.

FACTORY FINISHED MOULDING

IMPERIAL OAK

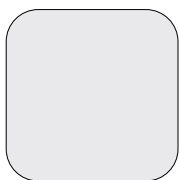

An antique, lighter colored oak finish.

ALYNNA WHITE

Mid-Am's exclusive paint finish. All products are carefully prepared for the best possible adhesion of the paint. Using the highest quality paint, the coverage provides a sharp finished product that will make a statement for your home.

VINYL & FLEX MOULDING

SMOOTH VINYL

100% cellular PVC is both moisture proof and energy efficient. It is also a cost-effective, low maintenance alternative to

wood. Unlike wood, the dimensions are consistent from piece to piece, and does not warp, cup, or bow. Smooth finish.

TEXTURED VINYL

100% cellular PVC with a woodgrain finish.

TAKE PRIDE IN YOUR HOME'S AESTHETICS.

Mid-Am's Prefinished Doors & Millwork Services

Prefinished Shop

Let Mid-Am prefinish your doors, moulding, and other millwork items. They are shipped ready to install, saving you the time spent painting or staining.

All doors and millwork are finished with the highest quality industrial water based products available. Products are prepped per the manufacturer's specifications and then finished in our 20,000 square foot finishing facility with a state of the art equipment, experienced technicians and proven processes.

CHOOSE FROM OUR BEAUTIFUL STANDARD STAIN COLORS, STANDARD PAINT COLORS OR PROVIDE A SAMPLE THAT CAN BE USED TO BLEND A CUSTOM COLOR

When it comes to color, wood is unpredictable. Each species of wood has its own characteristics creating unique looks and feel. The specie of wood, the grain pattern and the color will all affect the way stain absorbs into the wood and how it looks when complete. We go to great lengths to ensure consistency in our stain, however, due to the wood characteristics; no two pieces will look the same. This is the beauty of working with wood and we strive for a **blended** color that will enhance the beauty of the natural wood.

At Mid-Am, we have elected to hand wipe all of our stained products. After the product is prepped and sanded it is inspected carefully to ensure that it's ready for staining. This attention to detail provides the best possible coverage and consistency.

With painted products, Mid-Am carefully preps all products for the best adhesion of the paint. Using the highest quality paint, the coverage provides a sharp finished product that will make a statement for your home.

Choose from our beautiful stock colors or create your own custom color[†] that will compliment your home's aesthetics.

* Every piece of wood is unique. Color appearance is affected by many variables, including: species, hue, wood-tone, grain and lighting source (incandescent, fluorescent or natural sunlight)

For structural FRP columns, the install kit consists of 4 ABS brackets (2 for top of column and 2 for bottom) and fasteners required for standard installation. We recommend 2 kits for columns 16" and up: this will allow the installer to use 4 brackets at the top and bottom of the column. When installed, the cap and base will conceal these brackets and hardware.

**FRP COLUMN
INSTALLATION KIT**
FRPINSTALLX

Each kit contains six nylon locking straps with 1/8" spacers and one quart (1.85 lb.) automotive body filler. For columns over 12 foot in height, two kits will be required per column. Turncraft recommends using an abrasive (Carborundum or similar) or carbide blade to trim the shaft. Split columns are not load bearing.
